EX PARTE QUAYLE

This application is in condition for allowance except for the following formal matters:

Claim 1 is objected to because it does not clearly recite the preamble and the body. Also, the recitation “the common mode current” on line 1 lacks clear antecedent basis. The same is true for reciting “the respective inputs” in claim 5, “the amplifier stages” on line 11 of claim 11, and “the feedback resistors” on line of claims 13-14.

In claim 4, the recitation “the common mode” on line 2 of claim 4 should be corrected as –the common node—and “respective ones” on line 2 is not clearly defined. The same is true for claim 15.

Specification

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

Claims 1-19 are allowable over prior art of record because the prior art does not show an amplifier driving a respective one of the transistors.

Conclusion

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.
